

Preliminary program: CTG Masterclass

Facilitator: Susana Pereira

Time	Session topic
08:45	Registration
08:55	Welcome by Neoventa
09:00	Understanding the limitations of current CTG Guidelines. Why do we get it wrong?
09:15	Fetal Physiology in a nutshell: what you need to know to understand how a fetus protects the brain and the heart from hypoxia in labour
10:45	Break
11:00	Understanding the CTG features suggestive of fetal compensation and decompensation: Illustrative Case Discussion of gradually evolving hypoxia
11:30	What about infection/ inflammation? Recognizing signs of chorioamnionitis on the CTG
12:00	Acute and Subacute hypoxia
12:30	Illustrative Case Discussion
12:45	Lunch
13:30	Chronic Hypoxia and the Antenatal CTG: Is this fetus fit for labour?
15:15	Break
15:30	What is the role of Stan and how can we use it with physiological CTG classification in types of hypoxia
16:15	QUIZ and Questions Time
16:45	Close & Goodbye
